Reconstruction and Cold War in Germany Armin Grünbacher 2004 The story of the reconstruction of Germany, from a defeated and ruined fascist power to a democratic and economically dominant member of the European community, is one of the great stories of the twentieth century. This book explores one of the key institutions that helped generate this German recovery and shape its political landscape, the Kreditanstalt für Wiederaufbau, known in English as the Reconstruction Loan Corporation (RLC). Established in 1948, ostensibly to provide investment for German industry and help kick-

start the economy, the work of the RLC was from the very beginning highly politicized and its role in German reconstruction went much further than simply providing funds for capital investment. Through its relationship with the USA and the Marshall Plan, the RLC played a significant role in the development of the Federal Republic of Germany and shaping relations with other countries, including those of Eastern Europe. As such, the RLC soon became an important instrument in the struggle for balance between US influence on the German economy and Germany's drive to establish itself as an independent and equal partner within the western camp.

On a Global Mission: The Automobiles of General Motors

International Volume 3 Louis F. Fourie 2016-12-29 Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume

Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.
